

# INVITATION

DUTY OF CARE WORKSHOP  
18<sup>th</sup> May 2017 | Geneva

## Keeping duty of care on your agenda

Focus: People management & duty of care

*It is often difficult to prove the impact of preventing something, however we can demonstrate the cost to the individual and organisation when something hasn't been prevented - from an issue that remains unresolved to the aftermath of a security incident. We aim to change this thinking to position Duty of Care as important to programmes as wearing a seatbelt has become to safety standards.*

### Participants will leave this workshop with:

- › An understanding of their organisation's duty of care responsibilities
- › How to use duty of care as a prevention and enabling strategy
- › Knowledge of where duty of care sits within the different functional responsibilities – HR, Security, Health & Safety, Legal, management
- › The importance of security within people management and how security risk management and people management work together
- › Learning from HR, Security and Cigna experts on duty of care
- › Good networking opportunities with like-minded people to continue to grow and learn

### Who should attend?

This workshop is meant for senior management, HR & Security professionals in not-for-profit organisations.

Register now for this free event on [www.NGOhealthbenefits.com/events](http://www.NGOhealthbenefits.com/events)
